

FUNCTIONAL SUPPORT

- **CLINICAL TRIAL MANAGERS**

Streamlining the oversight of sites, tracking tasks, backlogs, performance, RBM, therapeutic-wide site level KPI data collation. Detection of unconsented patient data.

- **CLINICIANS**

Aid in their review of multiple, unwieldy and cumbersome listings into humanised text, because we know their time is best spent reviewing data than formatting data dumps.

- **DATA MANAGERS**

We can transform time-intensive review of manual listings into interactive tools that need no double-data review. Study metrics is one of our strengths (EDC-independent).

- **PK GROUPS**

Reconciliation is not only about sample tracking, but also about the relationship to exposure data. Improve your PK data quality with our PK tool. No manual data-review!

- **STATISTICIANS**

By collaborating with the above groups, the data reaches the statistician in a better condition. Good data = happy statistician = better decision making.

PROVIDING SOLUTIONS THAT WORK WITH YOUR DATA AND SYSTEMS

A&O is a unique 'Contract Service Organisation' (CSO) in the data field; Our key strength is in providing clients with data solutions using our off-the shelf tools or using existing client architecture for customised solutions. We simply help clients get access to their data faster. Our tools will run from any data source, on all computers with minimal complexity.

Off-the shelf tooling:- Eliminates 'programming lag', allows for faster deployment to teams and without new system architecture.

Custom tooling:- Where a bespoke solution is required, we can build something that the client actually requires. Bells and whistles often overcomplicate things. We omit these.

HOW OUR SOLUTIONS WORK: Our tools are built independently of existing systems and they function with any data source (e.g. RAVE, InForm, SDTM...). [See example](#)

Have a particular issue that requires an external solution? No matter how small or large. From creating a tool that automates regular listings into a readable format or getting data out of a myriad of systems, A&O is on-hand to assist. [Talk to us](#) in confidence.

PROCUREMENT OF SERVICES:

Flexibility between contractor deployment, Licensed solutions or Service Level Agreement.
